

Why is that even an issue? Did anyone ever rely on a AM/FM traffic and weather information? Even if it were dependable and complete I don't need it every hour on the hour or whenever it is they run at, XM had the right idea and they do a damn good job of it too. It could maybe be all fine to have a local FM weather and traffic report from say Dallas if you live in Dallas (which then you don't need a traffic report, you know what's going on and you can just look outside for weather), but what am I supposed to do going to or passing thru? Frantically scan my FM dial to maybe find a traffic report. This is stupid, please keep your hands off XM's T&W, it is a great service to XM subscribers (AND WE PAY FOR IT!) and reject the 04-160 NAB's petition. Thank you.
